

# (DON'T) *chew on this*

Not all pet dental products are created equal, and some can even damage your pet's teeth or worse. Here are some common products and the possible problems they can cause.

## ***But, wait! There's good news!***

Here's how you can choose your pet's dental products wisely:

- Select a chew treat that has received the Veterinary Oral Health Council (VOHC) Seal of Approval.
- Offer healthy, crunchy, edible snacks like carrots, green beans, or apple slices.
- Use puzzle toys that require your dog to push or paw for kibble to fall out.
